Evidence of a current Tuberculin test MUST be submitted no later than 10 days of admission. Students with a history of a previous or current positive Tuberculin skin test must submit a written report of a negative chest X-ray taken within six months of the student's first school quarter. A positive chest X-ray requires physician determination of non-infectiousness prior to admission. Chest X-ray are to be taken every 5 years. TB tests are to be taken annually. Students with a history of a previous or current positive tuberculin skin test must submit a written report of a negative chest X-ray taken within six months of the student's first school semester. A positive chest X-ray requires physician determination of non-infectiousness prior to admission.
